What the business is & why it could be interesting

[Company name] — [one-line description of what it sells and to whom]

In one line: [A fast-growing, capital-light X that does Y for Z — built on W, monetized through V, converting to ~XX% EBITDA margins. The thesis is real; the open question is the U of V beyond the first W.]

COMPANY OVERVIEW	PRODUCT & REVENUE MODEL
• Founded: [Year] HQ: [City] ~[XX] FTEs + [X]-person [faculty/contractor] bench • Core IP: [What is proprietary — methodology, dataset, platform, or brand] • Origin & diversification: [Started in X vertical; now ~XX% revenue is non-[X] (Y, Z, W)] • Delivery model: [Remote / on-site / hybrid; [contractor vs. employee mix]; capital-light / capital-intensive] • Leadership: [Founder-led; [X]-person leadership team concentrated in [region]]	• Product lines: [e.g., Cohort programs (workshops, diagnostics, coaching) tiered by seniority at \$X-\$Xk] • Revenue mix (LTM): [Core product ~XX% Demand gen / partnerships ~XX%] • Revenue model: [Not contractual SaaS, but structurally recurring — describe the re-engagement mechanic] • Pricing: [Recent ~XX% price increase planned; current range \$X.Xk-\$X.Xk per program] • Delivery economics: [~XX%+ gross margins driven by [contractor faculty / SaaS leverage / etc.]; ceiling is [capacity / capital / other]]

INITIAL INVESTMENT THESIS & FIT WITH RALLYDAY	KEY WATCHOUTS / AREAS TO PROVE
• [Thesis 1: e.g., Strong product-market fit and premium positioning; durability of revenue and post-rollout expansion are the value-defining variables] • [Thesis 2: e.g., People-first, behavior-change model aligns with Rallyday's founder-first orientation and human-capital lens] • [Thesis 3: e.g., Rallyday could add value by institutionalizing GTM, building operating cadence/KPIs, deepening management bench, and supporting M&A] • [Value-creation lever: e.g., Deeper penetration of existing logos (still <X% penetrated), new verticals, broader product suite, international expansion, pricing]	• Forecast achievability: [e.g., Case needs continued new-logo wins, cohort expansion, sales capacity and faculty availability — all in sync] • Revenue quality / cliff risk: [e.g., Non-contractual; validate renewal and re-engagement after the initial multi-year rollout completes] • IP & competitive defensibility: [e.g., Framework must stay differentiated vs. large consultancies and generic incumbents] • Founder / key-person dependence: [e.g., Assess reliance on senior thought leaders for selling, content credibility and delivery; limited buyer universe at exit]

The numbers, the customer base, and what to test first

\$ in millions unless noted; per the [Month Year] model summary (management-reported, unaudited)

(\$ in millions)	2022A	2023A	2024A	2025A	2026P	2027P	CAGR '23–'27
Total Revenue	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	XX%
% growth	—	XX%	XX%	XX%	XX%	XX%	—
Gross Profit	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	XX%
% margin	XX%	XX%	XX%	XX%	XX%	XX%	—
Adj. EBITDA	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	\$X.X	XX%
% margin	XX%	XX%	XX%	XX%	XX%	XX%	—

COGS shown collapsed. Spotlight column = first projected year ([Year]P). Reconcile model vs. CIM, which may show a different trajectory.

XX% Revenue CAGR 20XXA–20XXA	XX% Revenue CAGR 20XXA–20XXP	XX% EBITDA CAGR 20XXA–20XXP
--	--	---

Revenue Quality & Customer Base • Scale & breadth: [~\$XXM LTM revenue across [XX] paying customers (LTM [Mon-YY]); ~\$XXXk average revenue/client and [X,XXX]+ [units] trained support an enterprise-adoption story] • Concentration — manageable but real: [Top 10 = ~XX%; top 5 = XX%; largest = ~XX% of LTM revenue. Decompose to assess single-account risk] • End-market mix: [Vertical A ~XX% Vertical B ~XX% Vertical C ~XX% Other ~XX%] • Retention: [CIM cites ~XXX% avg LTM NRR — flag if spike is partly delivery timing vs. true expansion; separate true expansion from phasing before underwriting it]	Priority Diligence Questions • Bookings-to-revenue bridge: [By cohort, customer, product, and delivery month; quantify contracted / visible revenue into [Year]P–[Year]P] • Quality of earnings: [Reconcile reported vs. restated vs. adjusted EBITDA; test addback recurrence, owner/founder costs, and revenue-timing effects] • Retention & expansion: [Cohort performance and NRR by segment; contract terms and follow-on purchase behavior after the first program] • Delivery & GTM scalability: [Faculty utilization and QA; founder-led vs. sales-led motion; pipeline conversion; non-[core vertical] penetration]
